

These are the results of teachers and students' classes observations in Slovakia:

I. What did you learn?

- Articulation of different subjects in the same class.
- Learning can be fun and enjoyable and there's the involvement of kids in class.
- Things about Kosice.
- Teaching methodology in different classes.

II. What did you like the best?

- Some activities (in the lab; how to make mummies; Leggo buildings; singing in class; building things in technology lesson).
- Group works.
- Children teaching younger children.

III. What was the most helpful for you?

- Games played in class.
- Experiences in the lab.
- Using imagination in building stuff.
- Diversification of tasks in class.

IV. What would you change?

- Write the summary of the classes.
- More teacher-pupil-teacher interaction in some classes.
- There were no clear instructions or explanations in some classes.

V. How would you make it better?

- Some classes were pretty good, so there was nothing to improve.
- In other classes: use more different games; do more exercises to understand things better; more interaction between teachers and pupils. make pupils related what they did and what they have learned.
