

THE SCHOOL BEFORE AND NOW

STELA MATUOVÁ

EVERY CHILD GOES TO THE SCHOOL IN
SLOVAKIA NOWADAYS. ALSO MY
GRANDPARENTS WENT TO THE SCHOOL
SOME YEARS BEFORE. BUT MANY THINGS
WERE CHANGED FROM THESE DAYS...

My grandparents school

My grandparents had two time tables.

- Morning school
(started at 8:00 am and finished at 1:00 pm)
- Afternoon school
(started at 12:00 am and finished at 5:00 pm)

These school timetables were changed weekly.

They had different desks than we have.

My grandparents school

They had to go to school on Saturday.

They wrote with the pen which they had to put into the inkpot.

They didn't go to school in nature but they used to go to one day trip every year.

My grandparents and their school mates went out to collect the potatoes.

My school

My school starts at 8:00 am and usually ends at 1:30 pm.

I go to the school in nature every year. The best thing on this trip is that I don't have to learn there.

In our class we have got desks and chairs. We don't use the blackboard because we have interactive board and whiteboard.

We collect recycle paper four-times a the year to raise money for school. We write with ballpoint pen or with erasable pen.

Which school I like more

I like both these schools because they both are interesting.

But in my opinion new school is better because in this school is more options how to learn something.

Before students didn't have computers and interactive boards, but they learned how to work with tools, in the garden, cook,...

Now in some schools students learn from tablets. The best thing about this is that they do not have to carry a lot of books.

Thanks for attention
